IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

IN RE APPLICATION OF: ZHONG FAN

SERIAL NUMBER: 10/777,658

GROUP: 2616

FILED: FEBRUARY 13, 2004

EXAMINER: HOANG, THAI D.

FOR: ADDRESS AUTOCONFIGURATION IN AD HOC NETWORKS

ELECTION

COMMISSIONER FOR PATENTS
ALEXANDRIA, VIRGINIA 22313

SIR:

In response to the election requirement dated August 23, 2007, Applicants provisionally elect with traverse Group I, Claims 1-24 drawn to network combination, for further examination on the merits. Applicants reserve the right to file one or more divisional applications directed to the non-elected invention.

Furthermore, while the Election Requirement asserts that the application contains claims to patentably distinct inventions, MPEP § 803 states the following:

If the search and examination of an entire application can be made without serious burden, the Examiner must examine it on the merits, even though it includes claims to distinct or independent inventions.

Although the outstanding Official Action identifies different search classifications, it is believed that the claims of the present application would have to be searched in a handful of sub-classes. Furthermore, since electronic searching is commonly performed, a search may be made of a large number of, or theoretically all, subclasses without substantial additional effort. Accordingly, Applicants respectfully traverse the Restriction Requirement on the grounds that a search and examination of the entire application would not place a *serious*

Reply to Office Action of August 23, 2007

burden on the Examiner, whereas it would be a serious burden on Applicants to prosecute and maintain separate applications.

Therefore, it is respectfully requested that the restriction requirement be withdrawn, and that a full examination on the merits of claims 1-29 be conducted.

Respectfully Submitted,

OBLON, SPIVAK, McCLELLAND,
MAIER & NEUSTADT, P.C.
